

would like to see local micro-credential examples

A very good and knowledgeable presenter.

Wonderful insight.

Good.

keep up the good sharing.

Good Sharing

Overall the session is very informative and the speaker is highly knowledgeable in this area.

very useful, lot of information

Very good exposure for micro credential

Great session and knowledgeable. New knowledge. Tq CAES.

This session is good, especially for beginners. Need more sessions like this in the future.

good.

good

fruitful sharing session

An excellent sharing indeed.

saya sangat bersyukur tergerak hati utk join seminar ini dapat Alhamdulillah memahami konsep microcredential ini. sebelum ini kurang jelas, tetapi hari ini secara tak langsung dapat idea untuk buat microcredential. Terima kasih penganjur :)

good session

A good course and topic.

Very insightful sharing.

Contents of the Presentations are Good Informative....

This is a good initiative to instill the basic understanding of MC and encourage people to explore further. Prof Karim's talks are always motivating.

Mentor-mentee approach in developing the MC is much appreciated

Good

New exploration for a better future in teaching and learning.

Prof. Karim is very knowledgeable and he shared many important details during his talk.

Nothing to comment because Prof. Dr. Karim is always the BEST, always inspired. Saya doakan agar Prof akan sentiasa dikurniakan kesihatan supaya dapat terus membantu dan memandu semua para pendidik di seluruh Malaysia. Terima kasih banyak Professor Dr. Abdul Karim.

Would be great if the recording of this session can be shared with all the participants.

Clear the strategic direction, value proposition

Good topic to discover more.. Well done CAES

Interesting and benefits to our institution in developing microcredential

Very Good, please upload it on Youtube for future reference.

Very good materials in designing and development MC

Very informative and useful.. well done CAES for organizing this!

pls kindly share today's recording and slide which i think will be useful for me to develop MC. My email is cheongkm@utem.edu.my.

I hope CAES, PSTP, PPSH and Prof Jai's team can guide us further about how to create MC. I have developed Mandarin MOOC, I would like to explore more in MC. thanks for the initiative from CAES for organizing this sharing.

Cheong Kar Mee

A good enlightening on the potential of microcredential as a recognition of online courses for oneself development

Mohon share link video. Line internet tak stable hari ini.

ok

Looking forward to having this programme in UTeM, as well as participating and involves in this.

No comment, everything good

very nice webinar. wide and deep explanation about MC

Brilliant!

good topic and speaker

Really helpful in providing knowledge in future development of micro-credential courses.

-

Very good in understanding what I is micro credential it is especially in education perspective  
more webinars on MC implementation especially for academic programs

Inspiring

A very good sharing session.

penerangan yang hebat

Good

na

Very good info on mc, useful for staff to start off planning for mc under utem

non

Good Continue as it is please....

Many valuable input.

I am excited to design for micro credential materials. However, the direction of the university is not clear. That hampered my motivation.

We could follow up with internal workshop

Please share the presenter's content in a more proper way

I'm interested. I'm looking forward to attend any related workshop.

This is very good sharing.

Very good sharing and knowledge about MC.

Gain new knowledge related MC implementation.

This only an introduction. Need to move forward from here.

Good sharing session about micro-credential.

The talk is very inspiring and really provide motivation to us for trying to make MC a real one in UTeM.

No comment, overall good

It is a very good session. I have a better understanding of what MC is. Hope CAES can conduct further training for content developer

This session provide valuable information.

Caes can plan to develop list of courses will help in developing the micro-credential. (such as tools, skills, software, program).

puas dengan perkongsian petang ini dan semangat oleh pihak speaker

Really interesting. Actually, we (FKM and PSTP) in the midst of preparing one course for one of the govt agency. This is very enlighten. Thanks

None

Prof. Dr. Abd. Karim bin Alias, good speaker!

a clear understanding of micro-credential.

Hold a workshop where participants do hands-on activity to actually develop courses for their respective fields or area of interest.

Untuk makluman, saya (Albert Feisal, fptt) telah hadir kursus pensijilan micro credential pada september 2019 di utem dengan penceramah & facilitator ialah dari USM (team pasukan prof dr abd karim) . Bagaimanapun, bengkel tersebut tidak disesuli atau dimasukkan dalam the part of utem bigger picture atau action plan utem dan what's next for utem? Saya dengan rendah hati suka mencadangkan agar utem mempunyai a user freindly platform for microdential dengan template - apa yang pensyarah perlu adalah masukkan sahaja materials...dan pensyarah boleh buat their own promo, market & sales yang dibantu oleh pihak marketing utem....bagi saya amat menyedihkan kerana utem seringkali lewat mencipta dan merebut peluang - khususnya dalam penawaran kursus2 pensijilan microcredential. bagi saya sudah tiba masanya utem emngambil serius kurus microcredential ini...saya sendiri telah mengikuti kursus2 edx dan coursera menggunakan wang sendiri.
